

DEVELOPING THE ENTREPRENEURIAL CAPABILITIES OF YOUNG WOMEN

The second transnational meeting of Project DECOY took place in Antalya, Turkey on 13-14 March 2024. Representatives from the consortium countries - Iceland, Greece, Italy, France, and Turkey - convened to delve into crucial discussions regarding the finalization of project results and assess the impact achieved thus far. The meeting served as a platform to strategize the piloting activities for each work package, aiming to refine and enhance the project's outcomes. Additionally, attention was directed towards optimizing the Project DECOY website to better serve its objectives and audience.

VISIT TO ADULT EDUCATION CENTRE

In an effort to enhance the effectiveness of the WP3-Toolkit, partners embarked on a visit to an adult language learning center in Konyaalti, Antalya. During this visit, the consortium had the opportunity to administer several exercises from the toolkit, gathering valuable feedback on areas for improvement. The class comprised mostly B1 level Turkish students, predominantly from Ukrainian and Russian backgrounds.

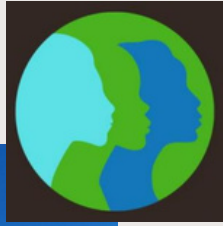

What made this interaction particularly impactful was the consortium's adeptness in multilingual communication. Despite diverse linguistic backgrounds, effective communication was established through the consortium members speaking Russian and Turkish as secondary languages. This ensured that the feedback process was thorough and comprehensive, setting a solid foundation for refining the toolkit to better cater to the needs of learners.

13-14 MARCH 2024

DEVELOPING THE ENTREPRENEURIAL CAPABILITIES OF YOUNG WOMEN

During the meeting, which coincided with the holy month of Ramadan, partners were graciously hosted by the organizing institution. As part of this hospitality, attendees were invited to participate in an iftar, the evening meal to break the fast. This provided a unique cultural experience and an opportunity for networking and camaraderie among consortium members.

The two-day event was filled with intensive work sessions and opportunities for sightseeing, allowing participants to make the most of their time together. Despite the busy schedule, the iftar served as a moment of cultural exchange and reflection, fostering a deeper understanding and appreciation among the diverse group of attendees.

This experience not only enriched the meeting but also underscored the importance of cultural sensitivity and inclusivity within collaborative endeavors. To learn more about the core aim of the project in empowering migrant women from different backgrounds, visit decoy-project.eu
